ADTF 2.x - Discontinuation

Tobias Schmid

Announcement

ADTF 2.x series are about to be discontinued. We encourage ADTF users to migrate ADTF 2.x projects to ADTF 3.x, which is the replacement for ADTF 2.x.

We are aware that many projects will still be in progress for the next few years. So we decided to have a step-by-step discontinuation process, that allows you to plan a "soft" change towards ADTF 3.x. The last minor release version of the ADTF 2.x series will be ADTF 2.14. Patches for this version will be provided for a limited period, after which support is completely stopped. The process discontinuation and its deadlines are explained in detail on the following pages.

Time line

digital werk

2018/12/31

- Sales and distribution of ADTF 2.x maintainance contracts ends
- Existing maintainance contracts will not be renewed

2019/12/31

- Sales and distribution of ADTF 2.x support stops
- Existing support contracts will not be renewed

2021/12/31
