**Description**

**Supportanfrage**

Unser Trainer hat noch einen Verbesserungsvorschlag für das Starten des launchers mit der Option Console:

Version ADTF 3.6.2

In the adtf\_control.adtfsettings file I changed the start adtf launcher to additionally have the --console parameter. (since I also want to have to console when I am launching directly from gui-control).  
But I found that this gives a conflict when you start with adtf-control or adtf gui control from the Configuration Editor. There the configuration of the launchers adds another --console option to the launcher call.  
I checked this starting the adtf\_launcher from the command line

```
adtf_launcher --session <session> --console --console
```

this fails silently without any notice. I see the following improvement possibility

1. This should just work like if you specify one --console or
2. Instead of silently failing: report an error.

The workaround is clear, I can add another launcher to the adtf\_control.adtfsettings and leave the original adtf launcher unchanged.

**Lösung**

Produktticket ACORE-10508 erstellt

## History

### #1 - 2020-04-23 11:09 - hidden

- Project changed from Public Support to 7
- Status changed from New to In Progress
- Topic set to ADTF::Launcher
- Affected Products ADTF 3.6.3 added

### #2 - 2020-04-27 17:16 - hidden

- Project changed from 7 to Public Support
- Description updated
- Status changed from In Progress to To Be Closed
- Private changed from Yes to No
- Resolution set to Product Issue Opened
- Product Issue Numbers set to <https://www.cip.audi.de/jira/browse/ACORE-10508>

- Support Level changed from 2nd Level to 3rd Level

Hi Anja,

danke fürs melden, kann ich reproduzieren und ist auch im aktuellen Stand 3.7.0 noch so.  
Hab ein Produktticket (ACORE-10508) erstellt, werden wir künftig fixen.

**#3 - 2020-04-27 17:17 - hidden**
