<b>Resolution:</b> No Customer Feedback	<b>FAQ Links:</b>
<b>Description</b>	
<b>Supportanfrage</b>	
Is there a standard filter in any of the toolboxes to convert the data from an ADTF .dat file (CAN recording) to a Vector CANoe readable file, e.g. .asc, .blf, .ttl, etc.?	
<b>Lösung</b>	
In ADTF 2.x you can use the Datexporter dazu to export/import data from/to dat recordings:	
<ul style="list-style-type: none"><li>• Kap. 3.10.1 DAT Exporter im <a href="#">ADTF Usermanual</a></li></ul>	
There is also a command line version:	
<ul style="list-style-type: none"><li>• Kap. 3.10.4 Command line DAT Exporter/Importer/Repair im <a href="#">ADTF Usermanual</a><ul style="list-style-type: none"><li>◦ In dessen --help gibt es meines Wissens auch ein Bsp. explizit für CAN ASC</li></ul></li></ul>	
The Device Toolbox provides an exporter sink for ASC:	
<ul style="list-style-type: none"><li>• Kap. 9.1.5 CAN im <a href="#">Device TB Usermanual</a></li></ul>	

## History

### #1 - 2021-01-14 14:22 - hidden

- Project changed from 11 to 30
- Status changed from New to Customer Feedback Required
- Topic set to DeviceTB::ASC

Hallo Christoph,

in ADTF 2.x dient der Datexporter dazu, Daten von/zu DAT zu exportieren/importieren mittels entsprechender Sinks:

- Kap. 3.10.1 DAT Exporter im [ADTF Usermanual](#)

Dazu gibt es auch ein Kommandozeilen Pendant:

- Kap. 3.10.4 Command line DAT Exporter/Importer/Repair im [ADTF Usermanual](#)
  - In dessen --help gibt es meines Wissens auch ein Bsp. explizit für CAN ASC

In der Device TB gibt es eine entsprechende Sink für ASC:

- Kap. 9.1.5 CAN im [Device TB Usermanual](#)

### #2 - 2021-01-22 16:21 - hidden

- Project changed from 30 to Public Support
- Description updated

- Status changed from Customer Feedback Required to To Be Closed
- Private changed from Yes to No
- Resolution set to No Customer Feedback

**#3 - 2021-07-26 13:24 - hidden**
