Hi John,

i think you refer to ADTF 3.x , right?
Please go to our Download Center - [Overview of Products and Documentation](#) site.
Here take a look to the [ADTF documentation](#) and to the [ADTF3 Guides](#).
Within the Guides you will also find a section [Getting Started](#)
Here you will find the information about how to use and start ADTF 3.x

Does this help you?

#5 - 2021-01-19 08:15 - hidden

- File Screenshot (1).png added

Yes I found it.

I am seeing no player found. Is this problem or need to install something else?

John

- Status changed from Customer Feedback Required to In Progress

- Affected Products ADTF 3.7.1 added

This could be a problem within the DEMO examples.

We will have a look into this.

You have tried to use the "Demo ADTF2 Video Decompressor Filter Session" example?

#7 - 2021-01-19 09:59 - hidden

- Affected Products deleted (ADTF 3.10.0)

#9 - 2021-01-20 07:45 - hidden

Demo ADTF2 Video Decompressor Filter Session using ADTF Control option gets stuck. If use ADTF Control with GUI option it seems to work

- Status changed from In Progress to Customer Feedback Required

Hi John,

If you follow our getting started, after launching with ADTF Control, the connected ADTF System / ADTF Launcher is in Runlevel 1 (RL_System).

You have to increase the Runlevel to 5 (RL_Running), in which the Player sends Samples.

See step 5 in linked tutorial https://support.digitalwerk.net/adtf/v3/guides/getting_started.html:

5. Now you are in the Interactive Mode of ADTF Control, the ADTF Session is already launched and in the first runlevel (RL_System). Type rl running or rl 5 into the console for changig to runlevel to RL_Running

I think this is your current state and description about "stuck", you have to do the same like you "click" in GUI Control.

If you want to direct launch running from ADTF Configuration using ADTF Control, you can extend the related Launch Options with --run or craete additional ones (Tools -> Options... -> Launchers)

- Options -> https://support.digitalwerk.net/adtf/v3/guides/tools_adtf_configuration_editor.html#options
- --run -> https://support.digitalwerk.net/adtf/v3/guides/tools_adtf_control.html

If you don't need control access during runtime, I would recommend the direct ADTF Launcher Options which will automatic set RL_Running:

- Default Launch Options -> https://support.digitalwerk.net/adtf/v3/guides/tools_adtf_configuration_editor.html#sessions_view
- Best Practise Tooling -> https://support.digitalwerk.net/adtf/v3/guides/bestpractice_tooling.html

Hi John,

have you received the last information?

We haven't got any feedback.

Can we close the ticket?

#12 - 2021-01-28 08:13 - hidden
