Resolution: Product Issue Opened	FAQ Links:

Description

Supportanfrage

Executing the following command causes an information dialog instead of a command line output

```
adtf_launcher.exe --version
```

This is counterintuitive and also impractical when retrieving ADTF's version via the aforementioned command, since it requires an user interaction.

How can I get ADTF's version using only the command line?

Lösung

this is not working for ADTF Launcher, which always opens a message box for version information. I opened a feature request:

- [ACORE-10965] - Always show version in console

Workaround:
Ask the ADTF Control instead
