Description

Supportanfrage

Changing upper/lower case of session name actually deletes it

If you create a new session, i.e. "New_Session" and rename it to "new_Session", for example, actually deletes it. Step can't be undone.
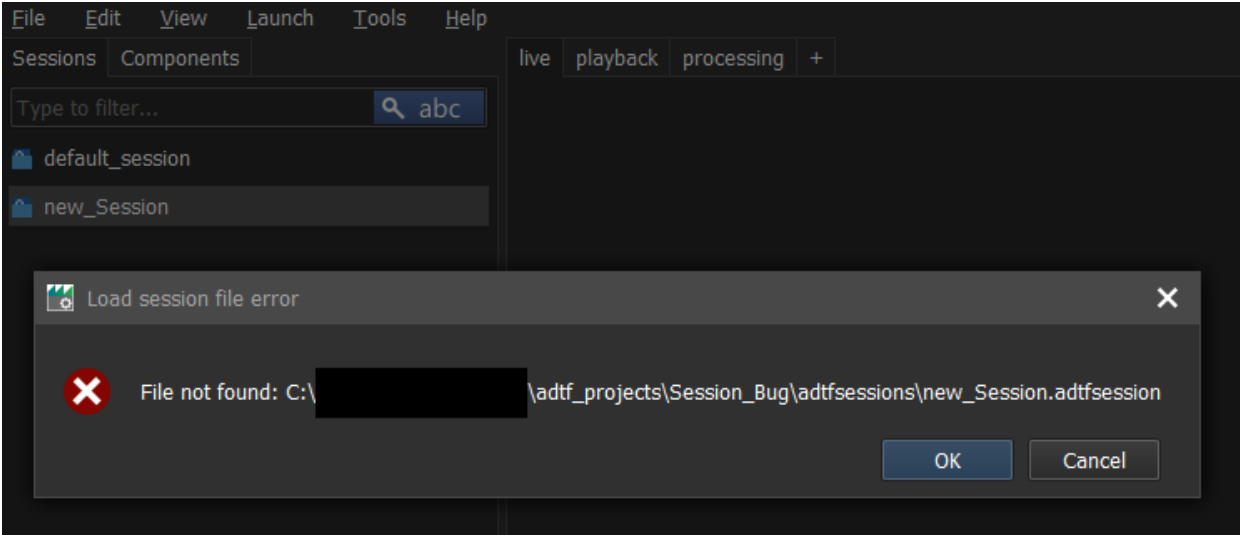

Tested with ADTF 3.9.1 and 3.11.2.

1.) Create a new session:

  New_Session.png
2.) Rename it (just change upper/lower case!)

  New_Session_renamed.png
3.) Trying to load ends in this error:

Lösung

Bugticket erstellt:

* [ACORE-10996] - Changing upper/lower case of session name actually deletes it

Hello Philipp,

I can reproduce this behaviour and forwarded this issue to a colleague.

Regards
Margarete

- Private changed from Yes to No

- Support Level changed from 2nd Level to 3rd Level

- Resolution set to Product Issue Opened

- Product Issue Numbers set to https://www.cip.audi.de/jira/browse/ACORE-10996

Hallo Philipp,

ich habe ein Bugticket dafür angelegt, das müssen wir in einer kommenden Version fixen:

- [ACORE-10996] - Changing upper/lower case of session name actually deletes it

In die 3.12.0 wird es der Fix nicht mehr schaffen.
