Description

Supportanfrage

Is it possible to define (additional) plugin directories in an adtfproject?

I do not mean the specific plugins for an adtfsystem, but the "$(ADTF_DIR)/addons/*/bin/*.adtfplugin" wildcard directories for all available filters and services. It seems at the moment there are only the global entries in CE's settings.

In the future that may become a problem, if one is working on different projects at the same time.
(IMO nearly all global settings are evil.)
