Description		
Support Request		
We would like to run ADTF in a headless mode. Do you know if there is a flag that needs to be set. How can I do that?		
Solution		
The recommended way to start ADTF Sessions "headless" zu is by using ADTF Control. You will find the commands in our Guides https://support.digitalwerk.net/adtf/v3/guides/tools_adtf_control.html or in control itself by using the adtf_control --help command.		
Please be aware headless is meaning no GUI, therefore all plugins using XSystem or Qt dependencies will not work in your sessions or adtfssystem file. Same for the GUI Tools. The launcher can be run directly or remote using ADTF Control, optionally in a batch/shell Script and/or Python.
