Description

Supportanfrage:

I am using ADTF 2.14.2 to try to extract index data from *idtb.dat to .mat data.

But, it seems that, it works for some streams, but will collapse ADTF sw by some other streams.

And, output indexed data works for hdf files, but not work for mat files.

Any ideas from your side? Or, do you need some more info about my problems?

Lösung:

ADTF MLSLBlockset must be installed. This function is not possible without it.
The function you want to use is DAT2MAT.

Import of ADTF Streams of an ADTF DAT File into MATLAB:
You can load ADTF DAT File into MATLAB using the parameter 'dat2mat'

Further Information on the ADTF MLSLBlockset manual at page 33 ff. and the given example (see also page 65).
