Hello Thomas,

...but I am also looking for the hardware requirements.

This is not specified yet and depends on your setup and configuration.  
But we have a task to achieve this for some basic use cases.

For basic setup we would suggest to use 8GB RAM, Dual Core CPU.  
If you need excessive UI algorithm, provide a fast GPU and maybe extend CPU and RAM.

**But as mentioned, the limitation depends on your use case and setup and is hard to common specify.**

Please let us know if this is helpful.
