| Description | |
| Supportanfrage | |
| I have installed ADTF 2.13.2 Version onto my Linux PC, for this which version of QT Creator is support in order to generate .plb files. QT Creator 5.* version is it supported for this purpose ? | |
| Lösung | |
| This is exceed our support range by far. | |
| Imho you have to use a Qt Creator which works with the needed compiler, libc and stuff. ADTF 2.6 comes with Ubuntu 14.04 and gcc4.6. So this is your dependency. | |
| I would suggest to get the Qt Creator for the required Qt Version 4.7.1 -> https://download.qt.io/official_releases/qtcreator/4.7/4.7.1/ And setup this. | |

Hi,

this is exceed our support range by far.

Imho you have to use a Qt Creator which works with the needed compiler, libc and stuff. ADTF 2.6 comes with Ubuntu 14.04 and gcc4.6. So this is your dependency.

I would suggest to get the Qt Creator for the required Qt Version 4.7.1 -> https://download.qt.io/official_releases/qtcreator/4.7/4.7.1/ And setup this.
